Education

University of Washington	Seattle, WA
B Master of Science in Computer Science and Engineering	2020-2022
GPA: 3.8 / 4.00	

University of Mumbai	India
Bachelor of Engineering in Information Technology	2015-2019
GPA: 3.6 / 4.00	

Experience

Microsoft	Redmond, WA
Azure Data Engineering Intern	May 2021- Aug 2021
- Built scalable ETL pipelines in Azure Data Factory and Data Lake Gen2 to process 500M+ telemetry logs daily. - Developed anomaly detection logic using PySpark and integrated into monitoring dashboards with Power BI. - Created SQL/KQL scripts for ad-hoc queries across distributed Azure Synapse databases.	

Infosys Ltd	Bangalore, India
Software Engineer – Data Platform	Jul 2019 – Jul 2020
- Created C#-based batch processing tools integrated with Azure Functions for automated reporting. - Developed Python-based data validation modules and unit test automation for ETL flows. - Used Azure Logic Apps for workflow orchestration, reducing manual overhead by 60%.	

Projects

Unified Metric Monitoring for IoT Pipelines
- Developed dashboard in Power BI and Synapse to visualize health metrics for streaming data. - Implemented automated alerts using Event Grid + Logic Apps on latency thresholds.

Skills

Python, C#, Java, SQL, KQL, Azure Data Factory, Synapse, Azure Functions, Logic Apps, Power BI, Event Grid, Azure Data Lake, Git, PySpark, Pandas, Scikit-learn, CI/CD pipelines, Terraform, Docker

Certifications

- Microsoft Certified: Azure Data Engineer Associate
- Data Engineering with Python – DataCamp
