## Education

---

### University of Texas

Austin, Texas

B.Sc. in Computer Science

2014-2018

GPA: 3.7 / 4.00

## Experience

---

### Dell Technologies

Austin, TX

Data Engineer II

Feb 2021- Present

- Designed resilient data pipelines in Azure Synapse Analytics to ingest and process operational telemetry.
- Built Power BI dashboards for internal business units, integrating DAX to measure reliability KPIs.
- Wrote advanced KQL queries across Azure Monitor Logs and integrated anomaly detection with Logic Apps.

### Rackspace Technology

Remote

Data Engineer I

June 2018 – Jan 2021

- Migrated on-prem SQL Server workloads to Azure SQL Database with ETL using Azure Data Factory.
- Collaborated with DevOps to deploy CI/CD pipelines for data jobs using GitHub Actions.
- Built data governance rules for GDPR compliance using Azure Purview (POC).

## Projects

---

### Fabric Telemetry Automation Framework

- Created metadata processing framework using Python and Azure Data Lake.
- Enabled automated schema validation and update notifications to partner teams.

## Skills

---

Python, SQL, KQL, Java, Azure Synapse, Azure SQL DB, Data Factory, Power BI, Azure Monitor, Git, Azure DevOps, Terraform, Docker, Data Modeling, Data Governance, ETL

## Certifications

---

- Microsoft Certified: Azure Fundamentals
- Building Data Lakes on Azure – Coursera
