Education

University of Waterloo

Canada

Bachelor of Applied Science in Software Engineering

2015-2019

GPA: 3.57 / 4.00

Experience

Shopify

Toronto, ON

Senior Data Engineer

March 2022- Present

- Designed scalable telemetry processing in Azure Data Explorer and automated data classification using metadata tags.
- Reduced query latency by 30% via pipeline optimization using partitioning and Synapse materialized views.
- Set up end-to-end CI/CD for ETL scripts using GitHub + Azure DevOps.

CGI Inc

Ottawa, ON

Data Engineer

Jan 2019 – Feb 2022

- Engineered metadata-driven ETL pipelines using Python and Azure Data Factory.
- Implemented monitoring and alerting on ingestion failures using Event Grid and Logic Apps.
- Led security audit of data lake policies and implemented row-level access in Synapse.

Projects

Data Quality and Governance Toolkit

- Built C# modules to enforce schema consistency and trigger notifications on data drift.
- Integrated Azure Key Vault for credential protection and secret rotation.

Skills

Python, SQL, C#, Bash, Azure Data Factory, Synapse, SQL DB, Data Lake, Event Grid, Power BI, GitHub, Azure DevOps, Terraform, Pandas, PySpark, MLflow

Certifications

- Microsoft Certified: Azure Data Engineer Associate
- Data Engineering – Udacity
